## CHART 1

### Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas decreased by 3.5% in September 2020 compared to September 2019, with decreases in both the OECD Americas and OECD Asia Oceania and an increase in OECD Europe. The negative trend was led by the OECD Americas (-4.6% y-o-y<sup>1</sup>), due to a production decline of 5.8% in the United States y-o-y. Production declined by 3.0% y-o-y in OECD Asia Oceania and rose in OECD Europe (4.0% y-o-y), where the positive trend was led by Norway (+37.0% y-o-y), whose increase appears high due to atypical low production last year. Overall, total OECD indigenous production of natural gas decreased by 1.2% on a year-to-date basis<sup>2</sup>.

Total OECD imports (entries)<sup>3</sup> of natural gas declined by 0.4% in September 2020 on a year-on-year basis. This trend was led by the OECD Americas (-14.0% y-o-y) with a 16.1% y-o-y decrease of imports from OECD countries. Both OECD Europe and OECD Asia Oceania balanced the trend with an increase in imports of 1.4% and 0.8% year-on-year, respectively. In terms of pipeline and LNG split, a decrease was observed for LNG imports (-6.5% y-o-y) while pipeline imports increased (+1.9% y-o-y) in the total OECD.

Total OECD exports (exits)<sup>3</sup> of natural gas increased by 2.7% in September 2020 compared to September 2019. Both the OECD Americas (-5.7% y-o-y) and OECD Asia Oceania (-0.1% y-o-y) experienced a decrease in exports. Following the same trend as for indigenous production, an increase in exports was observed in OECD Europe (+8.0% y-o-y), mainly to OECD countries (+14.8% y-o-y). Total OECD exports of LNG increased by 1.0% y-o-y, and the trend continued for pipeline exports with a 3.3% increase y-o-y.

Total OECD gross consumption of natural gas increased by 0.9% in September 2020 compared to the same month last year. Consumption declined in the OECD Americas (-1.1% y-o-y), driven mostly by decreases in the United States (-2.0% y-o-y) and Canada (-3.3% y-o-y). Meanwhile, consumption rose in OECD Europe (+3.4% y-o-y) and OECD Asia Oceania (+4.9% y-o-y). Overall, total OECD gross consumption of natural gas decreased by 2.4% on a year-to-date basis.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

## NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:  
<http://www.iea.org/t&c/termsandconditions/>

### 1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Denmark	September 2020
Israel	January 2010 to September 2020

### 2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Finland	Finland is reporting stock levels as of January 2019. Therefore, there is a break in stock levels between December 2018 and January 2019.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.  Information is based on data published by the Ministry of Energy and Water Resources as well as the Central
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
Netherlands	Starting with January 2019, more complete trade data is reported based on better information from the GATE terminal. Revisions for historical series are pending.
United Kingdom	Exits to the Isle of Man are reported under Non-specified/Other.  There is a break in stocks between March and April 2019 due to inclusion of stock held at LNG terminals.
